

YANA DUDAY

EXPERIENCE

Talent Development Specialist, Ball Aerospace & Technologies Corp.

2/2015 - Present

- Wrote over 10 JavaScript extensions for SharePoint using SharePoint Plus. These extensions allow the procedural generation of navigation menus, link lists, and other content without breakages or site downtime, using the SharePoint interface users were already accustomed to.
- Used HTML, CSS, jQuery, and JavaScript to design, implement, and launch the Security team's site and Security Training site. New sites implement modern design principles but remain backwards compatible with Internet Explorer 8, which is still in wide use at the company.
- Created default layout and theme mock-ups in Photoshop for the IT Collaboration team. These will be the company-wide templates after migration to SharePoint 2013, and will be used by thousands of employees.
- Re-designed internal websites to comply with modern design principles, increasing user engagement by 25%, and earning several commendations from executive leadership.

Training Coordinator, Ball Aerospace & Technologies Corp.

12/2012 - 2/2015

- Re-branded training department's internal website (introduced consistent style sheets, layout, and graphics on all pages), and implemented multiple new customer-requested features using JavaScript and jQuery.
- Created a JavaScript framework-driven layout to dynamically generate and allow simultaneous updates on a 70 web-page online competency development tool.
- Took on multiple IT responsibilities for the department including troubleshooting and administration.
- Created promotional and web graphics in Photoshop for department website.
- Created and maintained SharePoint workflows to fit customer needs of being efficient and straight-forward.

Contractor, Ball Aerospace & Technologies Corp.

Boulder, Colorado - 4/2011 - 12/2012

Student Assistant, National Snow and Ice Data Center

Boulder, Colorado - 3/2008 - 12/2010

- Maintained internal and public website using Dreamweaver, HTML, and CSS, including a smooth transition to a new layout without downtime.
- Created and maintained database information for NSIDC instrument database and meta database.
